SODA - Secure Off-site Data Archive

DATA IS THE HEART OF ALL ORGANISATIONS, WE MAKE SURE YOUR DATA IS ALWAYS SECURE

**How much is the safety of your business data worth to you?
What if you lost it all?**

Your computer data is the heart of your business: customer records, letters, e-mails, invoices, accounting data and protection data. Loss of business data will negatively effect business life and destroy business values. All businesses are vulnerable to theft, fire, flood, virus attacks and human error so the best way to protect your data is to use an offsite data backup system.

50% of UK Companies do not have any data recovery plan in place.

Without a 100% secure backup of your data you make your business very vulnerable. Imagine losing your data

What is SODA?

SODA (Secure Offsite Data Archive) is a fully automated offsite backup and disaster recovery managed service for businesses of all sizes. A simple, totally secure and cost effective way to backup your mission critical data ensuring it will always be available for restore regardless of disaster.

Key Benefits of SODA:

- SODA securely backs up all your computer files, databases and emails.
- If you accidentally delete a file our system can retrieve it.
- We check everything daily so if something isn't working we'll let you know.
- Wish you'd kept a previous version of a file? With SODA it's saved automatically.
- Peace of Mind: The lifeblood of your business is protected.
- Efficient: Computer data back-up is fully automated and monitored.
- Eases the Burden: SODA is a fully managed service; we look after everything.
- Compliance: Regulated industries can be required to store data off-site.
- Failsafe: Eliminates the risk associated with tape-based back-up systems.
- Liberating: You can rest assured and get on with running your business.
- Cost Effective: Fixed monthly payment plans based upon your individual business needs.
